Summary

Java Backend Developer with hands-on experience building backend applications and REST APIs using Java and Spring Boot. Skilled in Spring Security, JWT authentication, Spring Data JPA, Hibernate, SQL databases, and backend architecture, with experience implementing role-based access control, validation, DTO design, caching, and centralized exception handling.

Technical Skills

Languages: Java, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, REST APIs, Thymeleaf

Security: Spring Security, JWT, BCrypt, Role-Based Access Control, Permission-Based Authorization, OTP Verification

Databases: MySQL, PostgreSQL, MongoDB, H2 Database

Caching & Real-Time: Redis, Spring Cache, WebSockets

Core Java: OOP, Collections, Exception Handling, Multithreading, Java 8+, Streams API, DSA

Backend Practices: Layered Architecture, DTO Design, API Design, Validation, Global Exception Handling, Pagination, Search & Filtering

Tools: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Lombok, Docker

Testing & Cloud: JUnit, Mockito, AWS Basics, Railway

Training

Java Backend Trainee | Naresh IT Technologies, Hyderabad

Dec 2025 – May 2026

- Developed backend applications using Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, and layered architecture.
- Built REST APIs with JWT authentication, request validation, DTO mapping, centralized exception handling, and Swagger/OpenAPI documentation.

Projects

HourBook – Sports Ground Booking Platform

Java, Spring Boot, Spring Security, JWT, MySQL, Thymeleaf

GitHub: github.com/Vikasgabale9/HourBook

- Developed a modular sports ground booking platform supporting Admin, Vendor, and User workflows.
- Built authentication and OTP verification along with User, Vendor, KYC, and Ground Management modules.
- Implemented JWT authentication, role-based authorization, Spring Data JPA relationships, DTO-based APIs, validation, and centralized exception handling.
- Developed backend-driven Admin and Vendor panels using Thymeleaf for dashboards, profiles, KYC, and ground management.

RedPulse – Emergency Blood Donation Platform

Java, Spring Boot, Spring Security, JWT, H2 Database

GitHub: github.com/Vikasgabale9/redpulse

- Developed a secure RESTful backend for emergency blood donor coordination with 20+ APIs.
- Implemented JWT authentication, role-based authorization, donor management, blood requests, and administrative operations.
- Built location-based donor matching using the Haversine Distance Formula and integrated JavaMailSender and Spring Scheduler for automated notifications and request expiration.
- Documented APIs using Swagger/OpenAPI and implemented centralized exception handling for consistent API responses.

Smart Lost & Found System

Java, Spring Boot, Spring Security, MySQL

GitHub: github.com/Vikasgabale9/lostfound-tracker

- Developed a RESTful application for managing lost and found items using Spring Boot, Spring Security, JPA, Hibernate, and MySQL.
- Implemented BCrypt password encryption, role-based authorization, and permission-based access control using `@PreAuthorize`.
- Built APIs with bulk operations, location-based search, pagination, DTO mapping, validation, exception handling, and Swagger/OpenAPI documentation.

Technical Highlights

- Strong understanding of Java Collections Framework, HashMap internals, Exception Handling, Multithreading, and Java 8+ features including Lambda Expressions and Streams API.
- Practiced Data Structures and Algorithms using Java, covering Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Hashing, Recursion, and common problem-solving patterns.

Certifications & Achievements

- HackerRank Certifications:** Java (Basic), SQL, Software Engineer Intern.
- Solved **150+ DSA problems** across LeetCode and HackerRank.
- Achieved **100% in the Programming section** of TCS NQT with a **70% overall score**.

Education

B.Sc. Computer Science – CGPA: 8.0/10

Swami Ramanand Teerth Marathwada University

2022 – 2025

Nanded, Maharashtra
