Vikas Vitthalrao Gabale

Java Backend Developer | Spring Boot | REST APIs | Microservices
Hyderabad, Telangana (Open to Relocation, Available Immediately) | vikasgabale9@gmail.com | +91-9021952922
Portfolio | LinkedIn | GitHub | LeetCode | HackerRank

Summary

Java Backend Developer with hands-on experience developing Spring Boot REST APIs, JWT-secured applications, and Spring Cloud microservices. Built and deployed HourBook, a sports-ground booking platform featuring hourly slot validation, Razorpay payment integration, and Gmail API-based OTP delivery. Strong foundation in Java, OOP, SQL, and data structures and algorithms.

Technical Skills

Languages: Java 17+, SQL
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Thymeleaf
Security: Spring Security, JWT, OAuth 2.0, Auth0, BCrypt, Role-Based Authorization, OTP Verification
Databases: MySQL, MongoDB, H2
Microservices: Spring Cloud Gateway, Config Server, Eureka, OpenFeign, Resilience4j
CS Fundamentals: OOP, Collections, Streams, Exception Handling, Multithreading, DSA
Tools and Testing: Git, GitHub, Maven, Postman, Swagger/OpenAPI, JUnit, Lombok, Render

Projects

HourBook – Sports Ground Booking Platform GitHub | Live
Java 17, Spring Boot, Spring Data JPA, JWT, MySQL, Thymeleaf, Razorpay, Gmail API, OAuth 2.0, Render

- Built and deployed a multi-role booking platform for Users, Vendors and Admins using Spring Boot, Spring Data JPA and MySQL.
- Validated hourly booking slots on the server against ground operating hours and pending or confirmed bookings.
- Integrated Razorpay payment processing with server-side signature verification before confirming bookings.
- Secured REST APIs with JWT role-based authorization; MVC dashboards use session checks and an admin interceptor.
- Integrated Gmail API with OAuth 2.0 refresh tokens to send OTP emails, with credentials kept in environment variables.

Hotel Rating Platform – Microservices GitHub
Java, Spring Boot, Spring Cloud, Spring Security, Auth0, JWT, MySQL, MongoDB

- Built User, Hotel and Rating microservices with API Gateway, Config Server and Eureka Service Registry.
- Configured the Gateway and services as OAuth 2.0 resource servers validating Auth0 JWT issuer and audience; forwarded tokens via OpenFeign.
- Aggregated hotel and rating data with OpenFeign; MySQL (User, Hotel), MongoDB (Rating), Git-backed Config.
- Added Resilience4j circuit breakers with fallbacks and global exception handling in the User service.

RedPulse – Emergency Blood Donation Platform GitHub
Java, Spring Boot, Spring Security, JWT, H2

- Built REST APIs for donors, blood requests and admin operations secured with JWT, BCrypt and roles.
- Implemented donor matching by blood group and location using the Haversine distance formula.
- Used JavaMailSender and Spring Scheduler for notifications, request expiry and donor cooldown resets.

Training

Java Backend Trainee | Naresh IT Technologies, Hyderabad Dec 2025 – May 2026

- Trained in Java backend development using Spring Boot, Spring Data JPA, Hibernate, MySQL and REST APIs.

Certifications & Achievements

- **HackerRank Certifications:** Software Engineer Intern, Java (Basic), SQL (Basic).
- Solved **150+ DSA problems** on LeetCode and HackerRank.
- Scored **100%** in the Programming section of TCS NQT (**70%** overall).

Education

B.Sc. Computer Science – CGPA: 8.0/10 2022 – 2025
Swami Ramanand Teerth Marathwada University *Nanded, Maharashtra*
